Flow Control Valves

Series SRR

- robust, simple and reliable
- easy coil change without opening the hydraulic envelope
- flow rates are unaffected by temperature change or when the higher load pressure alternates between the outlet ports

the B port. The special orifice design ensures that the flow

setting is largely independent of the viscosity of the operating fluid. For a 2-way flow control function please ask

- easy to service
- dependable

1 Descriptions

1.1 Generals

The flow control valves of the SRR series are used to set the working speed of hydraulics actuators, the setting being load-independent, and pressure compensated. The flow rate is set by an adjustable slit-type orifice. When used as a 3-way valve, the higher pressure can be either at the A or

1.2 Application examples

- Harvesters
- Sweepers
- Refuse collection vehicles
- Fertiliser spreaders
- Trailered machines

2 Symbols

2.1 2 and 3-way flow control valves

2.2 3-way flow control with pressure relief

- Mowers
- Road rollers
- Municipal vehicles

Bucher Hydraulics.

- Forestry machines
- Wood chippers
- 2.3 3-way flow control with bypass check valve

2.4 3-way flow control with pressure relief and bypass CV

Reference: 100-P-000090-US-08

3 Technical data

General characteristics	Description, value, unit
Design	line mounting
Flow direction	$P \rightarrow A$ controlled $P \rightarrow R$ surplus flow discharge (models shown in 2.1 a. 2.3, surplus flow can be press.)
Seals	Viton (FPM)
De-energized position	orifice closed
Mounting attitude	unrestricted; preferably with coil at bottom (auto. air bleed)

Electrical characteristics	Description, value, unit
Design	high pressure; wet armature
Supply voltage	12 or 24 Volt DC from an electronic controller
Power consumption	27.6 Watt at 12 V coil and Imax. = 2,3 A 27,6 Watt at 24 V coil and Imax. = 1,15 A
Dither frequency required	50 Hz - 150 Hz (observe Imax.)
Relative duty cycle	100% at Imax.
Protection class (with a properly-fitted plug)	DIN plug - IP54; AMP Junior Timer - IP65; Deutsch plug - IP67
Electrical connection	plug-base with pins to DIN 43650; AMP Junior Timer plug connector (2-pole); Deutsch plug DT04-2P-EP04

Hydraulical characteristics	Description, value, unit		
Constant flow range in GPM _(US)	2.6, 4.2, 6.6, 8.5, 10.6, 13.2, 16.6, 21.1 ¹⁾		
Constant flow range in I/min	10, 16, 25, 32, 40, 50, 63, 80 ¹⁾		
Inlet flow	max. 26.42 GPM _(US) (100 l/min) ¹⁾		
Operating pressure	max. 4500 PSI (315 bar) ²⁾		
Leakage	max. 6.1 in ³ /min at 1450 PSI (100 cm ³ /min at 100 bar) ¹⁾		
Min. pressure difference (presure compensator)	100 PSI (7 bar)		
Control accuracy (as a % of the nominal flow): Load-dependency when under pressure Hysteresis when operated	max ±2,5 % ³⁾ max ±3,5 % ³⁾		
Fluids	mineral oil to DIN 51524 and DIN 51525 ⁴⁾		
Fluid temperature range	-5 °F to +175 °F		
Viscosity range	50 to 1500 S.U.S (10 to 300 mm ² /sec.		
Max. admissible level of contamination of the hydraulic fluid	NAS 1638 class 9, ISO 4406 class 20/18/15 (see section11)		

1) Values refer to an oil viscosity of 175 S.U.S.

2) For higher pressures, consult Bucher Hydraulics

3) Values refer to the selected flow range.

4) for other fluids, consult Bucher Hydraulics.

7) Constant flow range e.g. 2.6 GPM = 010, 4.2 GPM = 016, 6.6 GPM = 025, 8.5 GPM = 032, 10.6 GPM = 040, 13.2 GPM = 050, 16.6 GPM = 063, 21.1 GPM = 080 (for other flow ranges, contact Bucher Hydraulics)

8 Accessories

8.1 Adapter

Model	Description	Part number
Adapter M27x2 \rightarrow M22x1,5	Adapter with cutting edge	100000183
Adapter G ¾" -> G ½"	Adapter with sealing ring profiled sealing ring to DIN 3869 is included with delivery	100235660

8.2 Electronics

For controlling SR... flow control valves, we recommend the E.SK 103 and E.SK 106 series of control units and plug-in cards. These are used to control 1 or 2 proportional solenoids and can also operate on/off solenoids and other auxiliary functions. Plug-in cardse are available, and control units can be supplied that are supplied. The following table contains a small selection of the extensive range of accessories and electronics from Bucher Hydraulics.

Model	Description	Part number
ELSK106-91***	with screw terminals	100018790
ELSK106-81***	with screw terminals, encapsulated	100018791
ELSK106-81***/02	with screw terminals, encapsulated, with ramp 2s	100013454
ELSK106-81***/04	with screw terminals, encapsulated, with ramp 4s	100026079
Junior Timer 2Pol	plug, AMP J, with 2 m cable	100152575

9 Installation information

IMPORTANT!

When mounting the valve, ensure that the body is not subjected to any distorting forces. If necessary use shims to equalise the level of the mounting points. Do not use any pipe fittings with tapered-threads!

To ensure reliable operation, M27x2 or G3/4" fittings with threaded stud ends (length of stud end 16 mm) must be used.

If required, adapters for M27x2 to M22x1,5 or G $^{3}\!\!\!/_{2}$ " to G $^{1}\!\!/_{2}$ " can be supplied (see section 8).

Bleed all air from the system (if possible, operate the flow control valve several times at no-load)

10 Fluid

The oil for SRR.. products must have a minimum cleanliness level of 20/18/15 to ISO 4406 or class 9 to NAS 1638.

11 Fluid cleanliness

Cleanliness class (RK) onto ISO 4406 and NAS 1638

Code ISO 4406	Dirt particle number / 100 ml
